## U. S. STEEL INSPECTION PARTY. To Start on a Tour of Plants in Ten Days

With a View to Spending Millions. The annual tour of inspection by the Steel Corporation will begin on Dec. 9, when department of the steel corporation in lieving that the large holdings of Western the absence of President Schwab, will leave this city. The inspection party will include E. H. Gary, chairman of the board, H. H. Rogers, Norman B. Ream, William altogether too rapid to allow the operation Edenborn, W. P. Palmer, George G. to take place. The fact may indicate the character and purpose of to-day's buying. and W. B. Dickson. It is understood that

of the big steet combination and that suggestions will be made for necessary im-

provements and additions.

This year's inspection trip is of more than usual interest because of the plans of the Steel Corporation for the outlay of between \$25,000,000 and \$30,000,000 on improvements \$20,000,000 and \$30,000,000 on improvements and new plants. The carrying out of these plans have been delayed because of the litigation which has involved the stock conversion plan, providing for the con-version of \$200,000,000 of preferred stock version of \$200,000,000 of preferred stock into \$200,000,000 bonds, with an additional issue of \$50,000,000 bonds. Special attention will be given by the inspection party to the mills and furnaces in the Pittsburg district owned and operated by the corporation's subsidiary companies. The sites will be carefully gone over where it is proposed to build new plants, such as at Homestead, McKeesport, Lorain and Sharon. At McKeesport, the Corporation proposes to spend several millioon dollars in modernizing and enlarging the works of the National Tube Company. Important improvements are also planned in the Carnegie plant at Homestead, including three mills, open-hearth furnaces and other steel-producting plants.

FINANCIAL AND COMMERCIAL. FRIDAY, Nov. 28. Speculative sentiment in the security market this morning was favorably influenced by the failure of the Bank of England to raise its minimum rate of discoun and by the generally improved tone of advices from London and from all the Continental bourses. Inasmuch, however, as the English bank's proportion of reserve to liabilities decreased heavily during the week and is now much below the figure usually ruling at this time of year. rise in the bank's rate can hardly be long delayed. The Paris cheque rose to 25 france 1414 centimes, which makes t impossible to export gold from this side unless sterling exchange rises to the neighborhood of 4.8750. Sterling did rise to 4.8750 to-day and held its gain fairly well; but it is apparent that no gold exports need be expected by next Tuesday's steamer. Call money was a little firmer, and the indications for to-morrow's bank statement, so far as the loss in cash can be reckoned, were not good. The banks have lost on balance to the interior of the country and to the Sub-Treasury \$3,537,000. In addition, \$700,000 was to-day shipped to San Francisco and Chicago, the shipment to the former city being a little surprising, as it was supposed that demands there for cash had nearly ceased. Whether or not to-morrow's bank statement will be unfavorable depends upon the increase or decrease in the loan account; and concerning this matter there is, of course, no prophesying. A number of monthly and weekly statements of railroad earnings of varying tenor appeared. The Chesapeake and Ohio Cleveland, Cincinnati and St. Louis and Peoria and Eastern roads showed net decreases for October. Other roads made reports of small scattering increases or decreases. The notable statement of the day was that of the Atchison system for October, showing the large increase in gross earnings of \$520,008 and in ret of \$263,113, but exhibiting for the last four months, however, a net decrease in surplus of \$659 .-870. Exports of wheat for the week again fell off, amounting to 4,179,685 bushels, as against 5,277,726 bushels in the week preceding and 5,117,478 bushels last year. For the year to date exports of all our cereals are much less than those of last year. This

practically all questions in which Wall Street was interested. Indeed, it was stated that the message would prove to be a bull document. Another matter which gave cause for encouragement was the report from Scranton that President Roosevelt's arbitra-By order of the Board of Managers.

No such action was taken by the directors, but the price of the St. Paul shares did not, nevertheless, decline. Manhattan stock held at practically an unchanged price, while Brooklyn Rapid Transit and Metropolitan Street Railway were bid up on the renewed assertion that they were to figure in some way in a combination of all the transportation systems of the city. It is generally believed in the financial community that such a combination will be arranged at some future time; the combination does not, nevertheless, seem to be in sight just

now. The feature of the day's trading. however, was a rise of 6 points in Louisville and Nashville, nearly all of the gain being retained. The activity and strength of the stock were attributed, first, to the distribution by a large commission house in Richmond, Va., of a circular setting forth the comparative merits of the Louisville and Nashville and the Chicago, Milwaukee and St. Paul properties. The head of this commission house is one of the directors of the Louisville and Nashville road. The proposition advanced in the circular was that the intrinsic merit of the Louisville and Nashville road was nearly as great as that of the St. Paul, and that, therefore, the market value of Louisville and Nashville stock was altogether too low. The real reason for the advance in Louisville and Nashville was the rumor that the directors of the road at their forthcoming meeting would "placate" the minority interest in the property by declaring a semi-annual dividend of 3 per cent., placing the property on a 6 per cent, annual basis That rumor has many times been circulated in the Street, and authoritative contradiction has been given to it in this column. # THE OUTSIDE MARKET.

While prices in general showed a somewhat stronger tendency to-day on the curb, dealings for the most part were again on a moderate scale, and confined chiefly to Northern Securities and two or three of the copper shares, although elsewhere throughout the list several good gains were poted, in some of the less active shares, especially in American Can preferred and Virgina Coal and Coke. Northern Securities showed decided strength in the late dealings; due to the stronger tone displayed in the stock market and increased purchases by insiders it advanced I per cent and ended near the highest. The Interborough 40 per cent paid was about 1 per cent. off on light dealings, selling at 120.

There was further inside buying of the copper shares to-day and a considerable firmer tone was shown during the early trading, but with one exception slight reactions were noted before the close. Tennessee Copper was again manipulated by insiders, who forced the price up nearly 2 per cent, on fairly heavy purchases, but on light offerings at the close reacted nearly 1 per cent from the highest. Greene Consolidated Copper showed a further fractional advance on fairly heavy transactions. Monitreal and Boston was somewhat irregular and ended unchanged from the last final.

The transactions in the market to-day were as follows:
